OBJECTIVE

To bring together a passion for design with a curiosity of computer science in order to develop accessible and functional interfaces.

EXPERIENCE

Humboldt State University

User Interface Designer for Citing Insights team | March 2019 to present

- Working closely with backend programmers to create an appropriate user interface
- Developing userflow for user path/journey
- Creating multiple stages of wireframings
- Formulating responsive website design and color scheme
- Logo design

Freelance

Graphic Designer | August 2017 to present

- Conceptualized logo design
- Created design for products and services offered in local businesses

EDUCATION

B.A. Studio Art, *emphasis on graphic design* | Humboldt State University

Explored and attended classes of the following topics:

- Graphic design (Adobe studio programs)
- Art history (topics in western history, queer and female artists, and museum practices)
- 3D arts (oil painting, drawing, metalsmithing, mixed media)
- Computer Science working with languages such as JAVA, Python, and C++

Computer Science | Sonoma State University

Explored and attended classes of the following topics:

Computer Science foundational courses using C++, UNIX, and Python languages

Cognitive Psychology (viewing the complexity behind attention, memory, perception, etc)

3D arts (oil painting, drawing, mixed media)

Chicano studies

EXTRACURRICULAR

Women in Computer Science Club, Vice President | Humboldt State University

Served two semesters as vice president of WICS, a club dedicated to empowering women in the STEM field (particularly computer science majors) by offering support, tips, and study groups.

LANGUAGES

Spanish [Fluent and experience in translating between Spanish and English]

English [Fluent]

PROGRAMS

Adobe Illustrator

Adobe Photoshop

Adobe InDesign

Adobe After Effects

Balsamiq

OTHER SKILLS

Wireframing (user flow, low, mid, and high)

Userflow

Iterative design
